

RBI Risk Based Internal Audit (RBIA) Aligned • Multi-Language (EN/HI/MR/GU) • 17 Role-Based Views • Free Pilot Available

The Challenge

- Urban Cooperative Banks manage internal audit with paper files and Excel — while RBI compliance demands grow every year.
- Manual processes lead to missed findings, delayed compliance, and regulatory risk.
- Generic audit software is built for large commercial banks — too complex, too expensive, and English-only.

AEGIS: Purpose-Built for UCBs

Complete Audit Lifecycle

Risk assessment → planning → field execution → findings → compliance tracking → board reporting.
Replace 6 spreadsheets with 1 platform.

RBI RBIA Framework Built In

19-parameter risk assessment model.
